

EMBALM WITH PRECISION THE FRIGID EMBALMING MACHINE

THE FRIGID EMBALMING MACHINE FEATURES:

- Embalm with your fluid of choice. The machine has the ability to utilise the harshest products on the market, even phenols and high index cavity fluids. Embalm worry-free!
- Patent-pending Mix/Self-Clean port ensures a consistent mixture in your formula and reduces the threat of separating fluids.
- Custom-designed laboratory-strength Borosilicate Glass tank will not discolor, cloud or crack over time.
- Patent-pending Smart Lid provides a quick and easy way to pour fluids into the tank while reducing embalmer exposure to embalming solution fumes.
- Hydraulic flow sensor detects blockages and flow changes immediately in the system and shows up on the digital display.
- Dual Digital displays indicate precise pressure and flow data which is controlled by the embalmer. Available in Imperial or Metric units.
- Pressure range: 0 – 105 psi (0 - 724 kPa)
- Flow range: 0 – 80 oz/min. (0 - 2.36 liters/minute)
- Five distinct modes: Off/Gravity Embalm, Mix, Clean, Inject and Pulse (24 pulses per minute).
- Clearly visible Imperial/metric graduated tank with max capacity of 3 gallons or 12 Liters, respectively.
- Includes high pressure hose.
- Available in white, black or custom colors.

SPECIFICATIONS:

- Dimensions: 15.2" W x 19.3" H x 14.3" D (38,6 x 36,3 x 49 cm)
- Weight: 40 lbs (18 kg)
- Available in both 115 Volt & 230 Volt
- 2 year warranty

Embalm with your fluid of choice, including cavity fluids!

THE FRIGID SMART LID

The Frigid Smart Lid has an easy-open hatch that limits exposure risk to both chemicals and fumes. The hatch filter also helps reduce contaminants from within your solution.

3-SMARTLID
available each

HIGH PRESSURE HOSE

High pressure hose, with stopcock and window. Allows you to see your solution right before it enters the body.

3-FRIGIDHOSE
available each

The Frigid Embalming Machine Features:

- Embalm with any fluid of choice. The Frigid Ultra-Sonic can utilise the harshest products on the market, even phenols and high-index cavity fluids. Embalm worry-free!
- Patent-pending Mix/Self-Clean port ensures a consistent mixture of arterial solutions and reduces the threat of separating fluids.
- Custom-designed laboratory-strength Borosilicate Glass tank will not discolour, cloud or crack over time.
- Patent-pending Smart Lid provides a quick and easy way to pour fluids into the tank while reducing embalmer exposure to embalming solution fumes.
- Ultra-sonic flow sensor detects blockages and flow changes immediately and shows up on the digital display.
- Digital displays indicate precise pressure and flow data, which the embalmer controls. Available in Imperial or

Metric units.

- Pressure range: 0 – 100 psi (0 - 689 pascals)
- Flow range: 0 – 80 oz/min. (0 - 2.36 litres/minute)
- Five distinct modes: Off/Gravity Embalm, Mix, Clean, Inject and Pulse (24 pulses per minute).
- A clear Imperial/metric graduated tank with a max capacity of 3 gallons or 12 litres, respectively.
- Includes high-pressure hose.

Specifications:

- Dimensions: 15.2" W x 19.3" H x 14.3" D (38,6 x 36,3 x 49 cm)
- Weight: 40 lbs (18 kg)
- Available in both 120 Volt & 220 Volt
- 2-year warranty
